Experience

Cardinal Health Wavemark, City moussa center block C, Zalka Road, Beirut, Lebanon — *Analyst, Quality Control*

July 2019 – November 2020

This job opportunity helped me dive deep into the world of automation and automation testing. By being an analyst at Cardinal Health, I learnt the skills needed to make sure that the software being developed meets the required level of efficiency and the requirement of the business as well. Not to forget that this job helped me profound my skills as both automation engineer and a tester

Infosysta, Rivera center last floor, Cornich Al Mazeraa Beirut, Beirut Governorate, Lebanon— *Mobile app developer*

January 2019 - July 2019

This job opportunity introduced me to new concepts in software development such git, API calls the scrum team methodologies as well and IOS development. As well it helped me get familiar with the software development processes

Blom Bank, Salim Salam Branch Beirut, Beirut Governorate, Lebanon — *Compliance Officer Intern*

July 2017 - September 2017

This internship helped me get introduced to the market and work while sharpening my problem-solving skills

Freelancing, N/A — *Software Developer*

These projects help me improve my skills in coding and helped me understand the computer science basis in a client-oriented projects

Projects

ODIN — *protein quality assessment webtool*

ODIN is a web server designed to provide you the ability to assess the quality of
your protein tertiary structure at ease and with minimal interference. In other
words, having integrated a large set of widely used and known protein quality
assessment programs, ODIN is capable of fast delivery of a consensus protein
quality score representing an overall quality of the protein module submitted.
The tool was created as my capstone project during university years.
